Japanese, AB

Major in Japanese

The Japanese major combines thorough training in spoken and written language with study of Japanese culture through a broad range of materials and approaches, including classical and modern literature, linguistics, history, philosophy, visual arts, and popular culture. Most courses are conducted in Japanese.

Students are expected to study Japanese for four years, regardless of their level when they begin at Georgetown. Students must take at least one JAPN course taught in English in addition to "East Asia: Texts and Contexts." One or both semesters of junior year are usually spent abroad. The major culminates in a Senior Seminar in which students are generally expected to write a thesis paper of 25+ pages.

Honors Thesis Option: Students may be invited, on the basis of their work in the senior seminar, to complete an honors thesis in spring of the senior year. This longer thesis project requires the use of vernacular sources. Students who successfully complete and defend the honors thesis receive honors in the major upon graduation.

Majors are strongly recommended to fulfill half of the history portion of their College core requirement by taking at least one course in Japanese history. A variety of Japanese studies courses are also available through other departments, including Economics, Government, International Affairs, Theology and Religious Studies, and Art. These can be taken as free electives, or in some cases to fulfill core requirements. Outside courses can often be counted toward an Asian Studies Certificate for interested students. Students should seek help from their department advisors to develop a well-integrated academic program built around their interests and drawing upon this rich variety of resources.

Students are encouraged to further their understanding of Japanese culture by participating in the Japan Network, which conducts social and educational activities. Also, a wide range of literary and audio-visual materials concerning Japan is available at the University library. The Freer and Sackler Galleries of Art hold one of the finest collections of East Asian art in the world. The Library of Congress has the largest collection of Japanese books and periodicals outside Japan.

Integrated Writing

Writing takes place everywhere in the Japanese major, in many forms and levels of formality, including expository and creative writing as well as the art of translation, and including personal, public, and professional modes. Alongside expository writing in English about aspects of culture in East Asia, students also practice writing of increasing complexity in target language all through the course of their major. As approaches to careful observation of and careful thinking about their object, writing in English and writing in target language reinforce each other. Attention is also given to translation as a form of detailed interpretive commentary and as a means of examining temporally specific differences in linguistic structure, modes of argument, and perceptual and conceptual habits. Attention to English language writing skills in the field begins in the gateway course East Asia: Texts and Contexts. At the other end of the major, the capstone Senior Seminar guides students in the writing of extensive individual research papers. For more information on writing in the major, see the EALC department website (http://ealac.georgetown.edu/about).

Overseas Studies

Students majoring in Japanese are required to spend one semester (usually Junior year) in Japan and are encouraged to spend the entire year in Japan. Georgetown has formal arrangements for overseas study with Keio University, Sophia University, Waseda University, International Christian University in Tokyo and Nanzan University in Nagoya.

Asian Studies Certificate

Interested students majoring in Chinese, Japanese, Korean, or East Asian Languages & Cultures may also pursue an interdisciplinary certificate in Asian Studies (https://bulletin.georgetown.edu/programs/asian-studies-undergraduate-certificate/). A minimum of six semester courses is required, including the study of more than one Asian society or national group. Students should consult the Director of Asian Studies, SFS, for additional information.

Requirements

Requirements for the A.B. in Japanese

12 courses, including:

- EALC 1124 East Asia: Texts and Contexts
- 9 courses in Japanese language, 5 of which must at the 3000-level or above[1]
- 1 department course on Japanese culture, literature, or linguistics taught in English
- EALC 4101 Senior Seminar

[1] Note: students must complete or place out of First, Second and Third Level Japanese before enrolling in 3000-level language courses.

Georgetown Core Curriculum

The Georgetown Core Curriculum (Georgetown Core) is a distinctive expression of Georgetown University's identity as a student-centered research university rooted in the Jesuit and Catholic tradition. The Georgetown Core is a two-tiered program. The first tier – the "shared core" – has been created and approved by the Main Campus Core Curriculum Committee and is shared by all undergraduates as a common core experience. The second tier of the requirement – the "school-specific core" – is designed and determined by each of the undergraduate schools, embodying the shared learning goals of the university Core while furthering the specific mission and tradition of each school. Both the shared and school-specific cores change over time, balancing the traditional ethos of a liberal arts education with the changing needs of our students in a changing world. Ultimately, it is the hope that the entirety of a Georgetown education – the cores, majors and minors, and electives – will lead students to embody as life-long habits the goals described in the Georgetown Core Curriculum Learning Goals (https://bulletin.georgetown.edu/academics/undergraduate-regulations/georgetown-core-curriculum-requirements/georgetown-core-curriculum-goals/).

More information about the Georgetown Core Curriculum can be found on the Provost's Core Curriculum website (https://provost.georgetown.edu/academic-affairs/core-curriculum/).

Georgetown Shared Core Requirements

The core requirements that form the first tier, the common experience across the University, are outlined below. Georgetown courses fulfilling each of these requirements are designated "Core: [specific requirement]" in the Attributes in the Schedule of Classes (https://schedule.georgetown.edu/).

Philosophy – 2 Courses

Through the Core, the Philosophy Department is committed to providing courses that promote students' personal growth as human beings in search of meaningful lives, foster their development as responsible citizens, and offer effective introductions to the discipline of philosophy. The learning goals shared by courses in the Philosophy Core are:

- Understand what philosophy is, how it differs from other academic disciplines, and what its primary areas of inquiry are.
- Understand and construct arguments.
- Describe and analyze complex problems.
- Read, write and speak effectively.
- Engage critically and constructively with moral problems and decisions.
- Apply philosophical analysis, argumentation, and critical reflection to the study of other disciplines.

Please refer to each school/college curriculum for specific courses that will fulfill this requirement.

Theology and Religious Studies – 2 Courses

Through the Core, the Theology and Religious Studies Department is committed to fostering in students a critically appreciative awareness of the religious dimension of human existence, and to assisting students in reflecting upon their own experience and understanding in that enlarged context. The first course provides this foundation while the second course allows students to develop their critical awareness by applying it to a particular area of interest in religion or theology.

The learning goals shared by courses in the Theology and Religious Studies Core are:

- To consider reflectively your relationship to the world, your fellow humans, and God.
- To foster a critically appreciative awareness of the religious dimension of human existence.
- To assist you in reflecting upon your own experience and understanding in that enlarged context.
- To develop your critical awareness by applying it to a particular area of interest in religion or theology.

Problem of God[1] (THEO 1000) and one Theology and Religious Studies elective fulfill the Theology and Religious Studies requirement. Introduction to Biblical Literature (THEO 1100) may be substituted for Problem of God or may be used as an intermediate level elective.

[1] Transfer students are exempt from the Problem of God requirement and may select any two intermediate level courses, including Introduction to Biblical Literature, to fulfill the core requirement in Theology & Religious Studies.

Writing – 2 Courses

The writing requirement provides students with opportunities to connect their writing with critical reading and thinking, inquiry, and analysis. The Writing and Culture Seminar, WRIT 1150, approaches writing through three interrelated frameworks: writing as a tool for inquiry, writing as a process, and practice writing in different rhetorical situations. Each section focuses on a cultural theme, with readings and assignments that engage students with compelling questions and problems. Seminar readings provide texts for analysis as well as models and motives for student writing. Students are encouraged to complete this course during their first year at Georgetown. The learning goals shared by different sections in the Writing and Culture Seminar are:

- Experiment with diverse strategies for planning, drafting, and revising writing.
- Adapt writing to respond to, engage, and persuade audiences.
- Employ rhetorical strategies for analyzing, designing, and communicating in writing and other forms of media.
- Engage in writing as a form of thinking, inquiry, and learning.

The second half of the Writing Core is an intensive writing experience located within the student's chosen major, embedded within the requirements as determined by that program. Each major's Integrated Writing requirement is established by the department or program in order to express the unique conventions and practices of the discipline. The learning goals shared by courses in the Integrated Writing Core are:

- To prepare students to use the relevant forms, styles, and conventions of writing within their chosen major(s).
- To employ writing as a method to enhance students' learning of concepts, materials, and methods in their major.

Courses fulfilling this requirement are identified within each major.

Humanities: Art, Literature, Music, and Media (HALM) – 1 Course

(Formerly Humanities: Art, Literature and Culture (HALC))

The Humanities: Art, Literature, Music, and Media (HALM) requirement serves to deepen students' understanding and experience of a range of creative media representing cultural expressions from various historical periods and world regions, from the local to the global.

Through reading, listening, viewing, analyzing, writing, and/or creative practice, students acquire the intellectual and practical tools to interpret human experiences portrayed in the arts, literature, music, and media.

HALM Learning Goals:

- Understand how art, literature, music and/or media have historically shaped and been shaped by cultures.
- Develop generative habits of mind and exercise critical thinking skills for a world in flux: openness, resilience, curiosity, creativity, imagination.

- Activate knowledge through creative, analytical, and/or critical approaches in individual, collaborative, and/or public-facing projects.

HALM courses must be Georgetown University courses and cannot be fulfilled by transfer credits; they must be 3-credit courses. Courses that can fulfill other Core requirements (such as HIST, PHIL, THEO) are ineligible.

In 2026-27, the older "HALC" designation (Humanities: Arts, Literature, and Culture) will be replaced with HALM (Humanities: Arts, Literature, Music and Media). For this academic year, courses with the designation will be tagged with both HALC and HALM. In Fall 2027, the tag HALC will be retired in favor of HALM.

Science For All – 1 Course

The natural sciences, and the technologies that they enable, are woven deeply into the fabric of our lives and are central to many of the important political and social challenges that we face. They are also pinnacles of intellectual accomplishment in humanity's ancient and ongoing quest to understand the world in which we live. Thus we believe that to function as liberally educated, ethically responsible citizens, as stewards of the planet, and as effective leaders, all Georgetown students should understand scientific modes of thought and concepts, both in the abstract and as they are exemplified in at least one major area of scientific inquiry. The Science For All (SFA) Core requirement is grounded in these beliefs. The learning goals shared by courses in the Science for All Core are:

- To understand the basic principles and some current research challenges of one or more areas of science.
- To understand science as a set of methods of inquiry that involve forming and testing hypotheses through the analysis of quantitative and qualitative data.
- To consume and interpret scientific information with critical understanding of the balance of certainty and uncertainty that research findings inevitably reflect.

Quantitative Reasoning and Data Literacy – 1 Course

This requirement applies only to students in the class of 2028 and later.

The Quantitative Reasoning and Data Literacy (QRDL) requirement will help students learn to understand how real-world interpretation of data progresses from a set of numbers, frequently incomplete and with measurement errors, to a visual distillation that clearly conveys meaning. While mathematics and statistics provide a necessary foundation for quantitative reasoning and data literacy, the power of pure mathematics lies in its abstraction. In contrast, QRDL emphasizes a distinctive variety of concrete contexts and applications. The learning goals shared by courses in the Quantitative Reasoning and Data Literacy Core are:

- To build a quantitative toolbox that allows students to become comfortable performing and/or evaluating quantitative analyses.
- To translate and make meaning of data and quantitative analyses as they apply to complex problems.
- To effectively communicate statistical methods and results both visually and textually to a diversity of audiences with considerations to contextual, social, or ethical issues.

Engaging Diversity/Pathways to Social Justice

For students in the class of 2025, 2026, or 2027

Engaging Diversity (2 courses)

All Georgetown students are required to take two Engaging Diversity courses as overlays, meaning that the courses may count toward another degree requirement (Core, major, or minor). One of these courses must be labeled with a "Core: Diversity Domestic" attribute and one must be labeled with a "Core: Diversity Global" attribute.

In courses designated as fulfilling a diversity requirement, students will engage with different cultures, beliefs, and ideas. These courses will explore conditions that contribute to unequal access and influence. Finally, these courses should enable students to reflect on their own identities as they also deepen their understanding of the experience of others. The learning goals shared by courses in the Engaging Diversity Core are:

- To prepare students to be responsible, reflective, self-aware and respectful global citizens through recognizing the plurality of human experience and engaging with different cultures, beliefs, and ideas.
- To be better able to appreciate and reflect upon how human diversity and human identities shape our experience and understanding of the world.

For students in the class of 2028 and later

Pathways to Social Justice (3 courses)

Georgetown's Pathways to Social Justice (PSJ) curriculum prepares students to critically analyze historical and contemporary power differentials. By fulfilling the Pathways to Social Justice requirement, students will gain a better understanding of how social, political, geographic, economic, and other cultural factors shape experiences of the world, as well as how these factors contribute to marginalization and inequality. PSJ courses will also explore how communities have resisted marginalization, and will focus on axes of identity that have formed the basis for historical and contemporary marginalization and oppression, including race, gender, class, caste, disability, religion, sexual orientation, and gender identity.

A cornerstone of this requirement is the one-credit University Seminar in Race, Power, and Justice which is designed to ensure that every student at Georgetown develops a baseline vocabulary for discussing racial difference and marginalization. This seminar will provide the foundation for each student's engagement with other PSJ-attributed "overlay" courses offered across Georgetown's Main Campus and should be taken in the first year.

In addition to the required one-credit University Seminar in Race, Power, and Justice, the requirement also requires students to take two overlay courses (meaning that these courses may count toward another degree requirement, whether core, major, or minor). Eligible courses have the "Core: PSJ" attribute.

Each course in the Pathways to Social Justice Core works toward at least three of these shared priorities:

- Inclusive Scholarship
- Intersectional Approaches to Identity
- Historical Legacies of Inequality and Their Contemporary Impacts

- National, Regional, and Global Comparisons
- Imagining Justice
